

300 PIECE BONUS PUZZLE REFERENCE GRID

Use only if you need a little extra help!

That Fits There!™ Bonus Puzzle Reference Grid

Some That Fits There! puzzles are intentionally designed to provide a more advanced and rewarding challenge. If you become stuck, this Puzzle Reference Grid can help identify the correct location and orientation of individual pieces without taking away the satisfaction of completing the puzzle.

1. Use the Box Lid

Build directly on the box lid whenever possible. Viewing the puzzle against a different background often makes subtle colour and shading differences easier to see.

2. Use the Puzzle Reference Grid

If you become stuck, use this Reference Grid to identify the correct shape, position and orientation of individual pieces.

3. Sort Similar Piece Shapes

Many pieces share similar colours. Sorting pieces by shape before searching can make difficult sections much easier to complete.

4. Build in Small Sections

Focus on small areas of similar texture, lighting or detail rather than large blocks of colour.

5. Check Nearby Pieces

If a section doesn't seem quite right, try swapping neighbouring pieces and compare the surrounding colours and textures.

6. Enjoy the Challenge

These puzzles are designed to be relaxing, rewarding and proudly displayed when complete. Take your time and enjoy the journey.

REMEMBER:

Your box lid is always your best reference guide.
Use the Puzzle Reference Grid only when you need a little extra help.

Designed for puzzle enthusiasts who enjoy a more advanced and rewarding challenge.
